

# **MATERIALS BUSINESS CENTER**

**Creating a global epicenter for new products  
and businesses based on materials technology  
and innovation in Southern Sweden**

The term “materials” has a broad meaning and includes all new materials existing in solid states, particles or surfaces. It therefore includes a number of scientific disciplines such as materials science, life science, nanoscience etc.

## **The vision of Materials Business Center is to be a global epicenter for new products and businesses based on materials technology and innovation in Southern Sweden.**

By creating the right conditions for new business in the form of entrepreneurial companies, Materials Business Center mediates solutions to established industry and addresses the global challenges facing us all within energy, environment, food security and health, where new materials is a key part of the solution.

Materials Business Center will trigger growth through stimulation of new businesses as well as innovations through the matching of industrial challenges and needs with entrepreneurial drive and creativity. This allows us to take full advantage of the cutting-edge research

carried out in the region exemplified by the establishment of MAX IV and ESS.

The center will be a platform providing cross connections between companies, entrepreneurs and researchers. We are creating an environment where innovations can be initiated, the business potential within the materials area can be reached, and new companies and employment opportunities can be created.

Materials Business Center is an activity-driven place where valuable meetings take place. Please visit us at [www.materialsbusinesscenter.se](http://www.materialsbusinesscenter.se)

# JOIN US. YOU'RE IN GOOD COMPANY.

Materials Business Center is established as an international partner network, connecting industry, entrepreneurs, research institutes and universities with materials related operations.

#### **The value of being part of the network**

You are invited to take part of the innovative environment around the cutting edge research that will be conducted in connection with the materials research strongholds in the region. You also gain access to a network of established industries, academy and research institutions such as MAX IV, Nano Lund, DESY, ESS etc.

#### **More benefits**

- + Access the network's facilities and research capabilities.
- + Participate in recurring seminars, conferences and workshops.
- + Access Materials Business Center's Open Innovation platform.
- + Receive support from experienced business advisors.

# WELCOME. YOU'RE NEXT.

Materials Business Center is in the phase of establishing the platform built on models and experiences from other similar initiatives already established, for example within telecommunications in Southern Sweden. We welcome entrepreneurs as well as researchers and companies for which materials technologies are critical and strategic issues to get in touch.
